#### Use of this document

This document was prepared by VFund Management, Inc. (VFund or the Fund Manager) for Premiere Island Power REIT Corporation (PREIT or the Company) in compliance with the reportorial requirements of the REIT Implementing Rules and Regulations under Republic Act No. 9856 and is being submitted to the Securities and Exchange Commission (SEC), the Philippine Stock Exchange (PSE), and the Bureau of Internal Revenue (BIR).

No part of this document may be reproduced or transmitted in any form or by any means electronic or mechanical, including but not limited to photocopy, recording on any information storage and retrieval system without the written permission of PREIT, or a valid order of the SEC or the PSE. If you receive this document in error, please return to VFund.

#### I. Portfolio Overview

The Company's principal investment strategy is to invest in income-generating real estate. A core tenet of the Company's investment policy is to invest in properties that meet a select set of criteria designed to provide a competitive investment return to investors once said properties are in operation.

To meet the Company's investment criteria, a potential property should:

- be capable of being efficiently utilized for renewable energy, including whether that property
  meets specific technical considerations such as proximity to existing connection assets or other
  related infrastructure;
- may be utilized for hybrid power generation facilities consisting of (i) renewable energy, and (ii) either (a) energy storage systems, (b) baseload power generation facilities, or (c) both;
- to the extent the property may best be utilized for social or missionary electrification, may be located in underdeveloped or missionary areas where the Company, the Sponsors (hereinafter defined), and/or the companies under the Prime Asset Ventures, Inc. (PAVI) Group have completed and validated the availability and reliability of renewable energy resources, and such areas have the potential to drive long-term sustainable growth; and
- serve as an effective site for potential power generation lessees who are or will be well-placed
  to secure long-term offtake agreements with local electric cooperatives or distribution utilities
  in the absence of national-level electricity procurement programs such as the Feed-in Tariff
  (FIT), the Green Energy Auction Program (GEAP), or such successor programs headed or
  managed by the Department of Energy.

As of 30 June 2023, the property portfolio of the Company consists of land and power plant assets utilized in the power generation projects of the S.I. P0wer Corporation (**SIPCOR**) and Camotes Island Power Generation Corporation (**CAMPCOR**) (SIPCOR and CAMPCOR, collectively, the **Sponsors**).

The properties used in the operation of the 12.8 Megawatt (MW) heavy fuel oil (HFO)-fired power plants of SIPCOR located in Candanay Sur and Lazi, Siquijor (SIPCOR Power Plants) consist of (a) power plants assets such as HFO diesel generator sets and perimeter fence; (b) building that houses physical structures such as an administrative office, control room, warehouse, guard house, staff house, material recovery facility, work shop, firefighting shed, fuel tank farm, and fuel pump station; and (c) parcels of land (including the 3,000 sq.m. parcel of land located in Lazi, Siquijor, which is owned by the Company, and leasehold rights to 9,478 sq.m. parcel of land located in Candanay Sur, Siquijor) where the SIPCOR Power Plants are located (collectively, the SIPCOR Properties).

The properties used in the operation of the 8.4 Mw power plants of CAMPCOR located in Poro and Pilar, Camotes Island, Cebu (CAMPCOR Power Plants), consist of (a) buildings or powerhouse stations that house physical structures such as water treatment unit, staff house, radiator unit, fire pump house, guard house, oil-water separator, material recovery facility, reverse osmosis house, transformer house, warehouse, and administrative office; and (b) 16,406.5 sq.m. parcels of land owned by the Company where such buildings are located (collectively, the CAMPCOR Properties, and together with the SIPCOR Properties, the Properties).

All the Properties are leased to the Sponsors and are being used by the latter to operate the SIPCOR Power Plants and the CAMPCOR Power Plants, with a total combined installed capacity of 21.2 MW.

PREIT continuously seeks opportunities to acquire properties in prime locations through purchase or otherwise to increase its leasable assets.
